uvex Point of Difference	Benefits
uvex progression zones 	The transparent integrated optical correction starts in the region of the middle and the strength increases towards the lower edge of the lenses. The correction strength of the spectacle is +1.0 or +2.0 depending on the model.
3D ergonomic design - Softflex adjustable nose loops - 5 step inclination - Flexible side arms - Temple Softflex zone	- Comfortable fit even after long hours of wear - Can be individually adjusted - exceptional wearer comfort
uvex supravision excellence	Extremely scratch resistant on the outside and permanent anti-fog on the inside of the lens

Why uvex i-3 add cannot be certified to AS/NZS 1337.1

Product Certification can only be issued for product complying with a particular standard in full.

AS/NZS ISO 16034 – Cover a complete eye protector

AS/NZS 1337.1 – does not cover Ophthalmic Optics which deals with optical elements that are used to improve vision (powered lenses)

Therefore the uvex i-3 add, can only be certified to AS/NZS ISO 16034- Ophthalmic optics- Specifications for single-vision ready-to – wear near vision spectacles (covering the Optical performance ranges +1 to +3.5). And complying with AS/NZS 1337.1 as applicable. E.g. Impact, Lateral protection, Penetration, Splash proof, Dust proof requirements etc...

*AS/NZS ISO 16034 - Ophthalmic optics- Specifications for single-vision ready-to – wear near vision spectacles (covering the Optical performance ranges +1 to +3.5).
AS/NZS 1337.1 - Eye and face protectors for occupational applications.(covering Medium impact , lateral protection , penetration and others as applicable).
